Arbeitsgruppe Pferd presents:

EQUINE HEAD SURGERY DAYS 2026

Lüsche, Germany
April 15 to 17, 2026

This three-day course focusing on head disorders of the horse will provide up to twelve participants with an in-depth overview of surgical approaches, techniques, and outcomes for the most usual developmental and traumatic injuries.

The course is designed around practical wet labs covering the techniques learned during the theoretical sessions.

The Akademie für Tierärztliche Fortbildung (German Academy for Continuous Veterinary Education) has credited this course with 20 hours of Continuous Professional Education.

Expected outcomes

- At the end of the course participants are expected to be able to
- Recognize, workup and establish a plan for traumatic and congenital head disorders.
 - Perform surgical approaches to the sinus
 - Fixate rostral and mandibular ramus fractures
 - Deal with sinocutaneous tracts
 - Diagnose and treat temporohyoid disease

Prerequisites

- Knowledge and understanding of equine head anatomy
- Knowledge of basic surgical principles
- Familiarity with equine imaging techniques of the head

STORZ
KARL STORZ – ENDOSKOPE

The arthroscopy working stations are kindly provided by Storz and the equipment for the arthrocentesis by Veterinary Instrumentation

➤ **Why attend AGPferd courses?** Because there will be instructors of different professional and geographical background with outstanding knowledge and experience on the subject tackled.

➤ **What is different in AGPferd events?** We work in small groups of mostly very experienced participants. Apart from lecturing our instructors present their knowledge and skills in practical demonstrations. Plenty of time is always reserved for discussions. All this under professional conditions, with good food and in a collegial and relaxed atmosphere.
